## Summary

I develop machine learning methods and statistical models for real-world decision-making.

## Education

|                                                                                                                                                                                                                                                   |                    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| <b>Graduate</b> <b>CIMAT (Centro de Investigación en Matemáticas)</b> , Mathematics <ul style="list-style-type: none"> <li>Mentors: Dr. Carlos Valero, Dr. Rafael Herrera Guzmán.</li> </ul>                                                      | Guanajuato, Mexico |
| <b>BS</b> <b>University of Guanajuato</b> , Mathematics <ul style="list-style-type: none"> <li>Awarded a scholarship for research exploring properties of Hamiltonian dynamical systems; thesis approved unanimously by the committee.</li> </ul> | Guanajuato, Mexico |

## Experience

|                                                                                                                                                                                                                                                                                                                          |                                                       |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------|
| <b>Data Science Institute, University of Wisconsin–Madison</b> , Data Scientist<br>Developed machine learning methods and statistical models for real-world decision-making across collaborations in agriculture, biopharma, and other domains, before transitioning to full-time PhD studies. Mentored by Kyle Cranmer. | Madison, WI<br>Jan 2023 – Jan 2026<br>3 years 1 month |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------|

## Teaching

|                                                                                                                                            |                                       |
|--------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|
| <b>STAT 240 – Statistical Modeling, University of Wisconsin–Madison</b> , Teaching Assistant<br>Fall 2026, Department of Statistics (PhD). | Madison, WI<br>Jan 2026 – Jan 2026    |
| <b>Mathematics, CIMAT</b> , Teaching Assistant<br>Undergraduate.                                                                           | Guanajuato, Mexico                    |
| <b>Game Coder Studios</b> , Data Analyst                                                                                                   | Jan 2022 – Jan 2023                   |
| <b>BBVA</b> , Analyst Data Scientist                                                                                                       | Mexico & Spain<br>Jan 2021 – Jan 2022 |
| <b>Aprende Institute</b> , E-learning & Data                                                                                               | Jan 2021 – Jan 2021                   |
| <b>True Home</b> , Junior Data Scientist                                                                                                   | Jan 2019 – Jan 2021                   |

## Skills

**Programming:** Python, R, SQL, SAS  
**Cloud & DevOps:** AWS, GCP, Docker, Git, GitHub
